SECTION I

Highlights of Canadian Vacation Travel in 1976

A. INTRODUCTION

This report provides an analysis of a survey entitled "Vacation Travel By Canadians In 1976" conducted by TRAVELDATA INTERNATIONAL for both the U.S. and Canada. The sponsors of the survey were: (1) The United States Travel Service; (2) Canadian Government Office of Tourism; (3) Ministry of Transport (4) The Saskatchewan Department of Tourism and (5) The Montreal Star Ltd.

The survey represents the eleventh in an annual series of studies describing Canadian travel patterns and vacationer characteristics. This report incorporates series data, in some cases back to 1966, to facilitate trend analyses.

The report contains 10 volumes. Volume 1—**Summary Report**—provides information on Canadian travel to the United States as a whole. The remaining nine volumes highlight Canadian travel to the nine U.S. tourist regions.

Volume 1: **SUMMARY REPORT**—United States.

Volume 2: **NEW ENGLAND**—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.

Volume 3: **EASTERN GATEWAY**—New Jersey, New York.

Volume 4: **GEORGE WASHINGTON COUNTRY**—Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia.

Volume 5: **THE SOUTH**—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee.

Volume 6: **GREAT LAKES COUNTRY**—Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio, Wisconsin.

Volume 7: **MOUNTAIN WEST**—Colorado, Montana, Nebraska, North Dakota, South Dakota, Utah, Wyoming.

Volume 8: **FRONTIER WEST**—Arizona, Kansas, Missouri, New Mexico, Oklahoma, Texas.

Volume 9: **FAR WEST**—Alaska, California, Idaho, Nevada, Oregon, Washington.

Volume 10: **THE ISLANDS**—American Samoa, Guam, Hawaii, Puerto Rico, Virgin Islands.

B. METHODOLOGY

This survey was based on a national probability sample involving over 10,000 personal interviews with individuals 18 years old and over. The survey includes data on travel to the U.S. Islands (American Samoa, Guam, Hawaii, Puerto Rico, and the Virgin Islands), as well as to the U.S. mainland, to illustrate total Canadian vacation travel to the U.S.A.

Limitations: In some instances, the size of the sample used to determine the characteristics of Canadian travelers to various regions or states is small. Interpretation of data based on these small sample sizes should, therefore, be made with caution.

C. HIGHLIGHTS OF THE FINDINGS

1. Incidence of Canadian Vacation Travel

- Fewer Canadians took vacation trips in 1976 than in the year before as the incidence of vacation

travel dropped 3 percentage points from 59% in 1975 to 56% in 1976. This represents an 8% drop in projected trips—from 8.3 million in 1975 to 7.7 million in 1976.

- This decline in vacation travel in 1976 was widespread as Canadians from most provinces (except Ontario and British Columbia) and all socio-economic groups and age categories traveled less than in 1975.

- The decline in vacation travel occurred primarily among those who normally take only one vacation trip per year, as multiple trip takers continued to travel as often as before. The result was a very marginal increase in the average number of trips per year per traveler—from 1.50 in 1975 to 1.52 in 1976.

2. Destination of Canadian Vacation Trips

- Continuing a trend, the U.S.'s share of the Canadian vacation travel market grew from its 21% share in 1974 and 23% in 1975 to a record high of 25% in 1976.

- In contrast, travel by Canadians within Canada declined in share—from 66% of total trips in 1975 to 62% in 1976.

- Of the 2.1 million vacation trips to the U.S. in 1976 (+2% over 1975), The South (25%) and The Far West (24%) were the most frequently visited regions. New England (17%), Eastern Gateway (15%) and Great Lakes Country (12%) were the next most popular regions among Canadian vacationers in the U.S. in 1976.

- With respect to shifts in U.S. destination patterns by Canadians from 1975 to 1976, The Frontier West (+64%), George Washington Country (+36%) and The U.S. Islands (+31%) recorded the largest increases in Canadian vacation trips over 1975.

3. Trip Expenditures

- Although total vacation travel by Canadians in 1976 declined 8% from 1975, a 10% increase in average party trip expenditures (from $554/trip in 1975 to $607/trip in 1976) increased the total spending by Canadians on vacation trips in 1976 to about $3.2 billion, or 9% more than the estimated $2.9 billion spent during 1975.

- Canadian vacation expenditures in the U.S. were *$996 million* in 1976. This figure represents a 31% share of the total 1976 Canadian vacation expenditures and a 28% increase over the estimated *$777 million* spent in the U.S. by Canadian vacationers just one year earlier.

- Estimated expenditures for each region of the U.S. are dependent primarily upon the number of visitors, length of stay, accommodations used and purpose of trip. It follows, therefore, that The South (25%) and the Far West (18%) received the greatest shares of Canadian vacation spending in the U.S. during 1976. The Frontier West (+177%) and George Washington Country (+88%) experienced the largest increases in vacation receipts in 1976 over 1975.

- The average trip expenditure (including transportation) in the U.S. increased 19% from $687 in 1975 to $815 in 1976, reflecting both a longer length of stay in the U.S. and the inflationary effects on the cost of travel. By way of comparison, the average trip expenditure within Canada was estimated at $394 (+9% over 1975), while the comparable figure for overseas destinations was $1,603 (+2% over 1975).

- Per day party expenditures for trips within Canada were estimated at $37 (+23% over 1975), $56 in the U.S. (+14% over 1975) and $71 for overseas destinations (+1% over 1975).

- With respect to travel to the U.S., the over 40—married—upper income travelers tended to be the biggest spenders. In addition, those who traveled to the U.S. by air spent considerably more on the average than did those who traveled by car, while those on package tours and charter flights tended to spend more in the U.S. than did Canadians who traveled on scheduled flights or independently arranged vacations.

- Finally, the winter market appeared to be more lucrative than the spring, fall or summer markets.

4. Demographic Characteristics of the 1976 Canadian Vacationer

- The socio-economic profile of Canadian vacationers differed with respect to certain characteristics depending on whether their trip was to the U.S., overseas or within Canada.

- Briefly, the Canadian domestic vacation traveler tended to be: married (62%); employed in a white collar position (33%), skilled laborer (31%), or retired (11%); about 40 years old (36% falling between 18-29 years of age and 31% being 50 years of age or older); with a family income of at least $15.000 (52%); English speaking (67%); residing in an urban center (81%); and owning their own dwelling (64%).

- Comparatively speaking, the Canadian vacationer in the U.S. was: married (60%); tended to be employed more often in a white collar job (42%) and less often as a skilled laborer (29%) or retiree (10%); about 41 years of age (31% falling between 18 and 29 years of age and 33% being 50 years of age or older); with a higher family income, as 58% earned $15,000 or more; English speaking (66%); residing more often in an urban center (86%); and owned their own dwelling (65%).

5. Trip Characteristics

a) Trip Decision, Planning and Purchase Patterns

- The lead time in planning a U.S. vacation trip has not changed appreciably since 1975. Almost half (48%) made their decision to visit the U.S. within 4 weeks of their actual trip.

- Automobile trips appear to be slightly more spontaneous than air trips, as would be expected. Among auto travelers, 49% decided to visit the U.S. within four weeks of departure compared to slightly fewer, 44%, among air travelers.

- The use of travel agents for planning a vacation trip continued to grow in 1976. One out of five (20%) contacted a travel agent in 1976, a significant increase over both the 16% usage rate in 1975 and the 7% usage rate recorded in 1970. In 1976, travel agents were most commonly used by air travelers (52%), when planning an overseas trip (73%), when buying a package tour (83%) and when traveling on charter flights (88%).

- In 1976, an estimated 2% of all Canadian vacation trips to the U.S. involved the services of a travel agent. About 52% of the air trips to the U.S. and 17% of the bus and train trips involved a travel agent. On the other hand, only 4% of the auto trips and 4% of the motor camper trips involved the services of a travel agent. As might be anticipated, the use of a travel agent was greater among air travelers; for trips which lasted longer than one week; for winter or non-summer trips; and trips to vacation spots.

b) Mode of Transportation

- Among all Canadian vacation trips, air travel accounted for 34%, one percentage point more than in 1975, but still well below the high level of 39% recorded during the energy crisis in 1974. Of all Canadian vacation trips to the U.S., 31% were by air, representing a rebound from the relatively lower incidence (27%) of air usage in 1975—and nearly equal to the 32% share of Canadian air travel to the U.S. recorded in 1974.

- Auto travel to the U.S., on the other hand, has leveled off at about 58% in 1976, nearly equal to the 59% auto usage share reported in 1975. This share, however, is still well below the high rate of 65% auto share reported in 1973 which seems to suggest that the energy crisis of 1974 has had some longer range effects on travel behaviour.

c) Tours, Charter and Independent Travel

- "Inclusive package tours" were defined for the respondent as being a trip where "transportation, accommodation and other ground arrangements were bought as part of a package price." The popularity of these types of inclusive package tours continued to grow among Canadian vacationers. In 1976, 23% of all trips on common carriers involved a packaged tour. This is an increase over the 20% reported in 1975.

- As expected, the purchase of inclusive package tours was more common among vacationers to the U.S. than for vacation travel within Canada. In 1976, 31% of all "non-auto" trips to the U.S. were inclusive package tours.

- The Canadian's usage of charter flights for travel abroad did not appear to change between 1975 and 1976. Of all trips by air, 20% were on charter services. Additionally, the usage of charters to both overseas areas (38%) and the U.S. has remained fairly level in 1975 and 1976 (16% in 1975, 17% in 1976).

- The most popular U.S. regional destinations among charter travelers were the U.S. Islands, Florida and California.

- By way of comparison, 7% of all air trips within Canada were on charter, 51% of the air trips to the Caribbean were by charter and 33% (—5% from 1975) to Europe were on charters.

d) Seasonality

- A slight shift in the seasonality of Canadian vacation travel to the U.S. occurred between 1975 and 1976. More Canadians visited the U.S. during the winter months of January to March (up to 28% in 1976 from 23% in 1975) while fewer (down to 35% in 1976 from 42% 1975) came through the traditionally well-traveled summer months of July thru September. The harsh 1976 Canadian winter may have contributed to the smoothing of the seasonality factor.

- On the other hand, the seasonality of Canadian domestic vacation travel has retained its previous seasonality patterns. However, trips to overseas destinations have shown a slight move towards more summer travel (+5% from 1975) and less winter travel (—4% from 1975). Possibly, the U.S. winter markets absorbed some of this shift.

- While vacationing within Canada tended to be a summer activity, vacation travel to the U.S. continued to be split more evenly between "summer" and "winter" seasons. Approximately 49% of the trips to the U.S. occurred between June and September and 29% between December and March. Overall, Canadian vacation arrivals in the U.S. on a quarterly basis were as follows: 1st Quarter (23%); 2nd Quarter (18%); 3rd Quarter (42%); and 4th Quarter (17%).

e) Length of Trip

- The average duration of trip among Canadians vacationing in the U.S. was 14.6 nights, only marginally longer than the 1975 trip duration of 14.3 nights. Of the total 14.6 nights, 12.6 were in the U.S. while the remaining 2 nights were spent in Canada. It is interesting to note that of the 14.3 nights length of trip in 1975, 12.3 nights were in the U.S. while, again, 2 nights were spent in Canada.

- With respect to Canadian vacation travel within Canada, a decrease in the length of stay was recorded from 12.0 nights in 1975 to 10.8 nights in 1976. This decline is primarily the result of shorter domestic vacation trips among residents of Quebec and Ontario.

- The length of overseas trips averaged 22.5 nights in 1976, about the same as in 1975.

f) Purpose of Trip

- In 1976, the most frequently mentioned reason by Canadians for vacationing in the U.S. was "to spend some time at a vacation spot" (43%). The second most popular reason was "to visit friends and relatives" (41%), followed by "sightseeing and doing things in cities and towns" (26%). Participation in non-city activities was mentioned by 33% of the Canadians who vacationed in the U.S. with 17% mentioning sightseeing in rural areas and 16% mentioning camping, fishing, boating and other outdoor activities.

- Only 2% of the Canadians who vacationed in the U.S. during 1976 indicated that they were motivated primarily by Bicentennial events. It is possible, however, that the Bicentennial may have had a less direct or secondary role in motivating Canadians to visit the U.S.

- Skiing is unquestionably a popular sport among Canadians. According to the survey, at least one active skier lives in as many as 1 out of 4 households (23%). However, most skiing was done within the province of residence. From only 2% of the households surveyed did someone take a ski trip to the U.S. in 1976. Less than half of one percent indicated having skied in other countries during the year. However, 5% of the households interviewed in British Columbia reported having skied in the U.S. during 1976.

- "To visit friends and relatives" (48%) continued to be the most prevalent reason for taking a vacation trip within Canada. Other frequently mentioned reasons included "to spend time at a vacation spot" (32%) and "sightseeing and doing things in cities and towns" (18%).

- The average number of reasons offered by the traveler for "main purposes of trip" was 1.7. Overall, spending time at a vacation spot was more important in 1976 than in 1975 while camping and sightseeing were stressed less often.

g) Composition of Traveling Party

- Although the composition of the Canadian vacation party traveling to the U.S. continued to be primarily "adults only" (58%), the average size party increased from 2.76 adults in 1975 to 3.20 in 1976.

- In 1976, the most popular types of accommodations used by Canadians vacationing in the U.S. were motels/hotels (65%), friends and relatives (32%) and campgrounds (19%).

- As one might expect, the type of accommodation used in the U.S. differed considerably depending on the nature of the destination. For example, camping was most popular in New England and the Mountain West Regions. Ethnic and social ties were strong motivations for Canadians who visited Massachusetts, California and the Great Lakes Region, as 49% on the average stayed with friends and relatives as compared to 32% for the U.S. as a whole. On the other hand, hotels/motels were utilized more often by "vacation spot" visitors in The South and Far West Regions, 74% and 72% respectively.

6. Impressions and Attitudes of Canadian Vacationers Toward the U.S.

a) Prices in the U.S. vs. Canada

- To some extent, the growth of travel to the U.S. and the recent increase in interest for shopping in the U.S. by Canadians may be an indicator of the belief that the U.S. is relatively less expensive for most goods and services than is Canada. Findings from the survey indicate that 41% of the respondents believe that Canada is more expensive than the U.S., compared to only 13% who felt that the U.S. was more expensive. The greatest perceived disparity in costs between the U.S. and Canada, where the U.S. was seen as being less expensive was with gasoline, followed closely by food, accommodations and souvenir/gift shopping.

b) Favorable Impressions of the U.S.

- Canadians who traveled to the U.S. on vacations during 1976 were asked what they perceived as their "most favorable impressions about vacationing in the U.S."

- As in 1975, response was varied, again supporting the theory that the U.S. provides a broad base of appeal to Canadians. The physical beauty and weather were most impressive to visitors—particularly the beaches and the water, as well as the scenery in general. Perhaps as a result of the unusually cold and wet weather in many regions of Canada during 1976, more Canadians appeared to be attracted by the American climate—29% in 1976 as compared to 23% in 1975.

- Another appeal of significance was "lower prices" —mentioned by 15%, up from 7% a year earlier and re-enforcing the "less expensive" image previously discussed.

- Further, only 16% did not provide a positive comment, suggesting a high degree of visitor satisfaction.

c) Unfavorable Impressions of the U.S.

- The U.S. appears to be increasing in favorability among Canadian vacationers as 65% of those who visited the U.S. in 1976 had no unfavorable comments—up from the 58% recorded a year earlier.

- Among those who cited some negative aspects of travel in the U.S., the most frequent comments focused on "social conditions" such as "dirtiness and smog" (4%), "too crowded" (3%) and "violence" (2%). Another 4% indicated that they did not like the food or beer.

SECTION II

Characteristics of Canadian Vacation Trips/Travelers To the Eastern Gateway in 1976

A. HIGHLIGHTS

During 1976, the number of Canadian vacation trips to the Eastern Gateway was estimated at 252,000 or 12% of the total 2 million vacation trips to the United States.

As was also the case in 1975, the Eastern Gateway's share of vacation expenditures was significantly less than its share of vacation trips. In 1976, Canadian vacationers spent nearly $1 billion in the U.S. with 8% or $77 million, spent in the Eastern Gateway. Canadian expenditures on each trip per adult amounted to $194 compared to the national average of $283. This relatively low trip spending in the Eastern Gateway as compared to the rest of the United States was partly a function of a shorter length of stay in the Eastern Gateway by Canadians (10.8 nights on average) than in the U.S. as a whole (12.6 nights on average), as well as lower daily expenditures per adult in the Eastern Gateway ($18), than in the nation in general ($23).

252,000 Canadian vacation trips to the Eastern Gateway (—20% from 1975)

- 12% of total Canadian vacation trips to the U.S.
- 4th most popuular region in the U.S. for Canadian vacationers.

$77 Million Spent In The Eastern Gateway By Canadian vacationers (—3% from 1975)

- 8% of total vacation expenditures in the U.S.
- 6th largest recipient of Canadian vacation dollars
- $194 spent per adult per trip (+16% from 1975)
- $18 daily spending per adult per trip (no change from 1975)
- the modest 3% decrease in Canadian spending in the Eastern Gateway in 1976 from 1975 came about primarily because of a balancing between the reduced number of Canadians visiting the region (—20%) on the one hand, and the increased expenditures per adult per trip (+16% from 1975).

100%

1. Profile of Canadian Vacation Travelers to the Eastern Gateway

The Canadian traveler vacationing in the Eastern Gateway in 1976 can be described as follows: 91% lived in cities; nearly half (47%) were from Ontario; 56% spoke English; 55% owned their own homes; 53% were men; 58% were married; 46% had either attended or completed high school. Forty percent were employed in white collar jobs; 53% had family incomes of between $10,000 and $20,000 annually; and 59% were adults who had no children living at home.

Their travel habits can be summarized as follows: 65% traveled to the U.S. by automobile; 66% traveled between July and September; 38% visited friends or relatives; 34% stayed in motels; 77% planned their trips within two months of departure; their average length of stay in the United States was 10.8 nights.

PROFILE OF 1976 CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY

Traveler Characteristics	
Residence:	Urban (91%) Ontario (47%), Quebec (44%) English-speaking (56%) and French-speaking (30%) Population over 500,000 (59%) Residence of auto visitors: Ontario (45%), Quebec (42%)
Dwelling Status:	Live in single/semi-detached dwelling (53%) Own their own dwelling (55%)
Sex:	Male (53%)
Age:	18-29 years (40%) and 50 years and over (22%)
Marital Status:	Married (58%)
Education:	Attended or completed high school (46%)
Occupation:	Professional/Managerial/Sales/White collar (40%) Skilled workers (36%)
Family Income:	$10,000 to $20,000 (53%) $20,000 and over (31%)
Family Composition:	Adults only (59%)
Trip Characteristics	
Purpose:	To visit friends or relatives (38%) To spend some time at a vacation spot (37%)
Main Mode of Transport:	Auto (65%)
Seasonality:	3rd quarter (66%), July (37%), August (21%)
Mean Length of Stay:	10.8 nights
Package Tours:	(18%) of those traveling on common carrier
Mean Size of Traveling Party:	3.52 persons
Use of a Travel Agent:	16% used in planning
Decision Lead Time:	Planned trip within 2 months of departure (77%)
Favorable Impressions of the Eastern Gateway:	Facilities (31%) and Physical beauty (30%)
Unfavorable Impressions of the Eastern Gateway:	None recalled (53%)
Accommodation:	Motel (34%), Hotel (24%)

SIGNIFICANT CHANGES IN CANADIAN VACATION TRAVEL TO THE EASTERN GATEWAY FROM 1975 to 1976

- Increases in:

  —English speaking visitors (51% to 56%)
  —visitors living in row houses (16% to 23%)
  —tenants (38% to 45%)
  —male visitors (42% to 53%)
  —visitors earning $20,000 or more (25% to 31%)
  —"adults only" visitors (54% to 59%)
  —urban sightseers (20% to 29%)
  —visitors attending special events (8% to 13%)
  —packaged tour users (8% to 18% of common carrier travelers)
  —third quarter visitors (60% to 66%)
  —July visitors (31% to 37%)
  —visitors spending 4-5 nights (14% to 20%)
  —visitors spending 24 nights or over (2% to 8%)
  —visitors favorably impressed with the weather (10% to 15%)
  —visitors who had no unfavorable impressions (47% to 53%)

- Decreases in:

  —auto visitors from Quebec (49% to 42%)
  —visitors from cities of 100,000 to 500,000 population (15% to 9%)
  —visitors living in detached or semi-detached homes (59% to 53%)
  —home owners (62% to 55%)
  —female visitors (58% to 47%)
  —visitors aged 30-39 (23% to 18%)
  —white collar workers (47% to 40%)
  —visitors with children (46% to 41%)
  —October visitors (9% to 3%)
  —visitors spending 1-3 nights (24% to 16%)
  —visitors spending 12-23 nights (25% to 17%)
  —visitors disappointed by the facilities (18 % to 9%)

SIGNIFICANT DIFFERENCES BETWEEN CANADIAN VACATION TRAVEL TO THE EASTERN GATEWAY AND TO THE U.S. AS A WHOLE

- The Eastern Gateway compared to the U.S. as a whole had a much higher proportion of:

  —visitors from Quebec
  —visitors from larger (500,000+) cities
  —French-speaking visitors
  —visitors living in multiple family dwellings
  —tenants
  —auto travelers
  —summer (third-quarter) visitors
  —July vacationers

—visitors spending fewer than 6 nights
—travelers planning their trips within 4 weeks of departure

- The Eastern Gateway compared to the U.S. as a whole had a much lower proportion of:

—visitors from Western Canada
—English-speaking visitors
—visitors living in single/semi-detached homes
—homeowners
—senior visitors (50+)
—air travelers
—package tour users
—winter vacationers
—visitors spending 12-23 nights
—vacationers using a travel agent
—visitors with no unfavorable impressions

B. DETAILED FINDINGS

The Canadian vacation market for the Eastern Gateway during 1976 is described under the following three section headings: 1. Trips/Receipts; 2. Traveler Characteristics; and 3. Trip Characteristics.

1. Trips/Receipts

In 1976, the Eastern Gateway ranked as the 4th most popular destination for Canadians vacationing in the U.S., and ranked 6th in terms of receipts. The region received an estimated 12% of vacation trips from Canada and 8% of the tourist receipts during that year.

In absolute numbers, these percentages represent 252,000 vacation trips among the 2,081,000 trips to the United States in total during 1976. (An additional 51,000 Canadian trips involved one or more nights in the Eastern Gateway en route to other regions.) Of the $996 million spent by Canadian vacationers in the U.S. in 1976, the Eastern Gateway received an estimated $77 million.

In comparison to 1975, trips to the Eastern Gateway decreased 20% (from 316,000) representing a partial erosion of the unusually high increase of the preceding year (from 190,000 in 1974 to 316,000 in 1975). In terms of share of trips to the United States, the loss was 3 percentage points—from 15% in 1975 to 12% in 1976.

This represents a return to the same share as in 1974.

Canadian vacation expenditures in the Eastern Gateway also declined, from $79 million in 1975 to $77 million in 1976. While this decline is quite small in absolute terms, it nevertheless represents a rather sharp contrast against the 28% increase in expenditures for the nation as a whole in 1976 over 1975. (See Appendix B-1).

The per capita trip spending (per adult) among visitors to the Eastern Gateway actually increased by 16% from 1975, from $167 to $194, while daily expenditures per adult remained unchanged at $18.

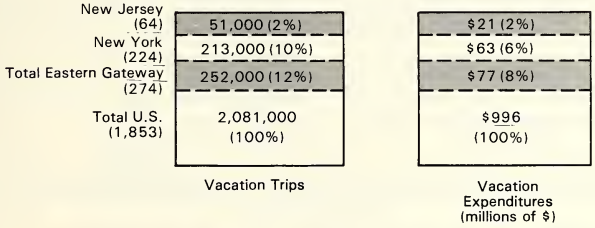
New York remained the most popular travel destination within the Eastern Gateway region. Among those vacationing in the region in 1976, 85% stayed one or more nights in New York, while 20% stayed in New Jersey. This represents a strong increase in New York's share of the Eastern Gateway visitors since 1975 when 72% stayed in that state and 30% stayed in New Jersey.

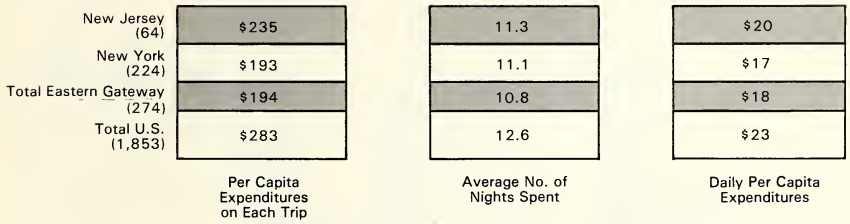
Vacationers to New York spent an estimated $63 million in the region, up 3% from 1974. However, the number of Canadian trips taken to New York actually declined, from 227,000 in 1975 to 213,000 in 1976.

New Jersey, on the other hand, experienced losses in both visits and receipts. In 1976, $21 million was spent by Canadians on 51,000 vacation trips—representing declines of 12% and 47% respectively.

Chart 2

CHARACTERISTICS OF CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY (1976 Expenditures in U.S. Only)





2. Traveler Characteristics

This section represents a brief analysis of the following demographic characteristics of 1976 Canadian vacation travelers to the Eastern Gateway: province of residence; residence of auto vacationers; size of community fo residence; language spoken; type of dwelling occupied/ownership; sex; age; marital status; education; occupation; family income; and family income.

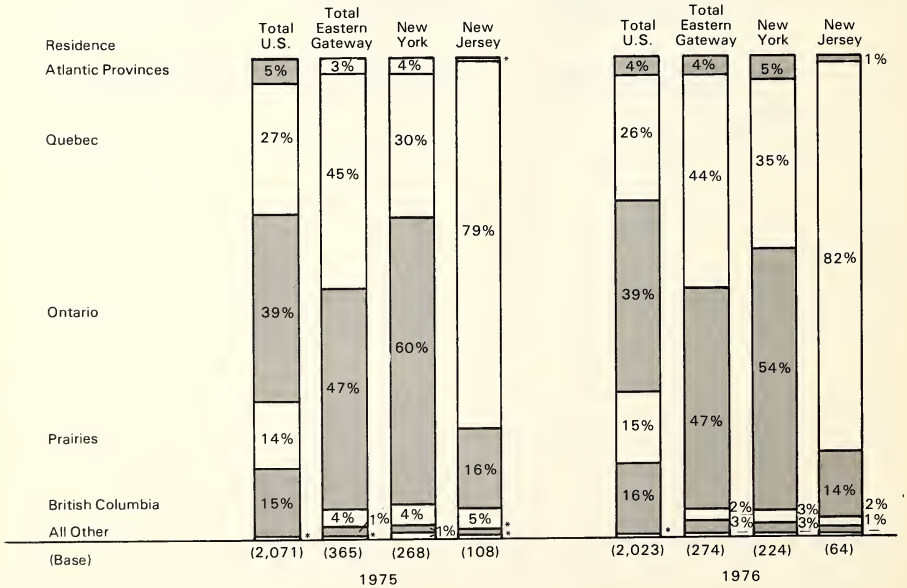
a) Province of Residence

Ontario and Quebec remained the key Canadian markets for the Eastern Gateway in 1976, with 91% of all visitors vacationing in this region residing in those two provinces (47% in Ontario, and 44% in Quebec). Only 9% of the Eastern Gateway's Canadian visitors resided in other provinces.

Between 1975 and 1976, there was very little change in the origin of Canadian vacationers to the Eastern Gateway; Ontario's share remained at 47%, and Quebec's dropped only marginally from 45% to 44%. These percentages have remained about the same over the three years from 1974.

The origin of visitors to each of the two states comprising the region, however, did change. The proportion of New York's Canadian visitors which came from Quebec increased from 30% in 1975 to 35% in 1976, while the Ontario representation dropped from 60% to 54%. The trend in New Jersey, while not as marked, was nevertheless in the same direction. In 1976, 82% of New Jersey's visitors came from Quebec, up from 79% in 1975, while Ontario's share declined modestly from 16% in 1975 to 14% in 1976.

Chart 3
CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY RESIDENCE



*Less than ½ of 1%.

b) Residence of Auto Visitors

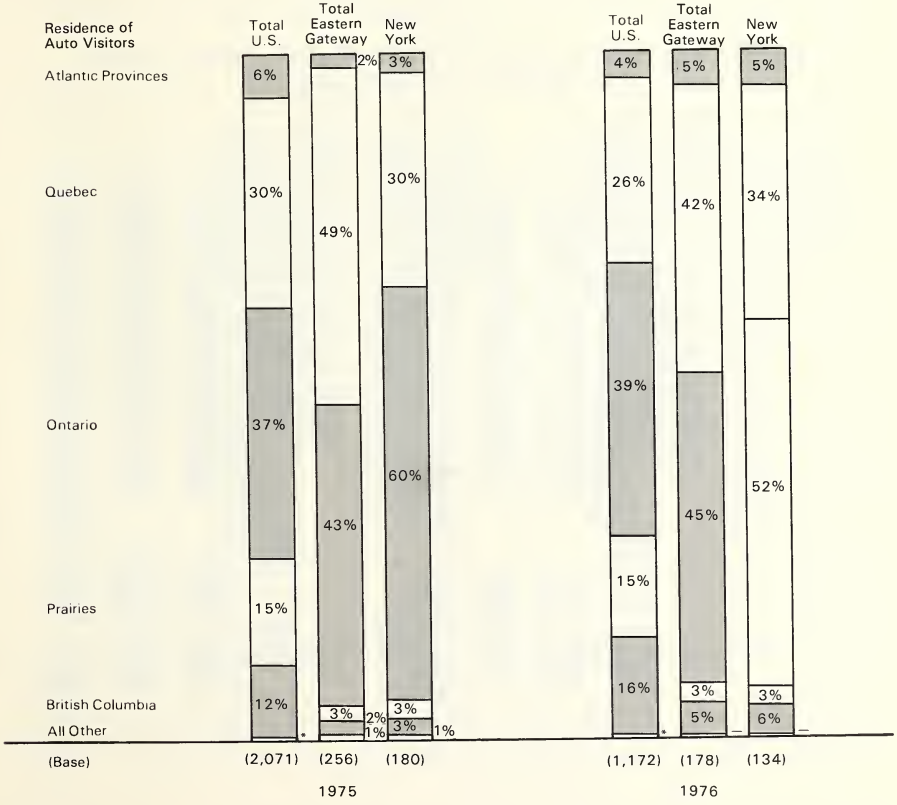
As was the case in 1975, the auto vacationer visiting the Eastern Gateway in 1976 had a residency profile which was very similar to that of the total market. (This is not surprising, since auto vacationers represented 65% of total visitors to the Eastern Gateway.)

In 1976, 45% of the auto vacationers visiting the Eastern Gateway were from Ontario, up only slightly from 43% in 1975. However, the 42% of auto vacationers to the Eastern Gateway who came from Quebec in 1976 was down considerably from the 49% registered in 1975.

Compared to the regional pattern, New York's automobile visitors were more likely to come from Ontario and less likely from Quebec. It should be noted that comparable figures are not shown for New Jersey due to the small base size for this segment.

Chart 4

CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY RESIDENCE OF AUTO VISITORS



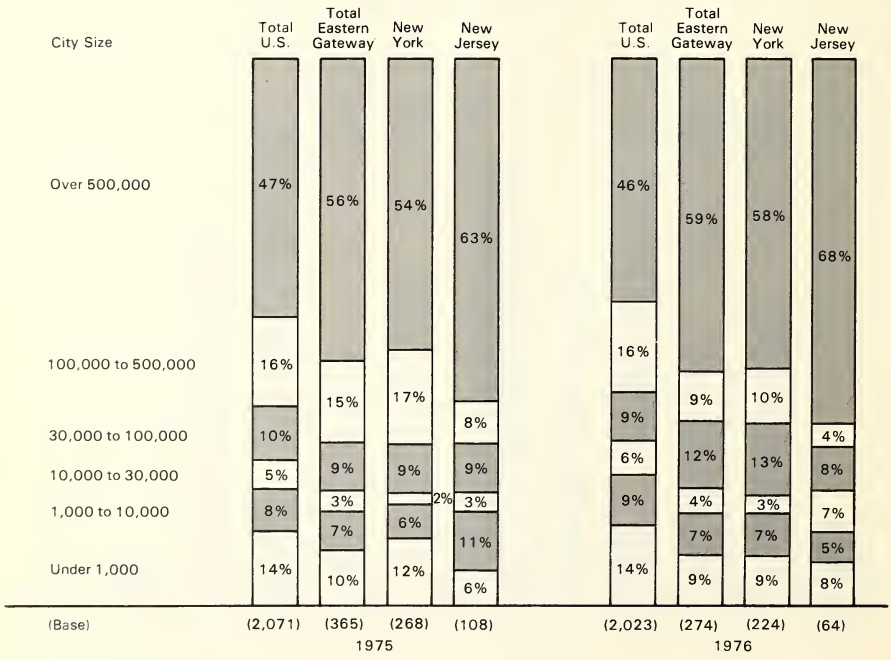
*Less than ½ of 1%

c) Size of Community of Residence

In 1976 the vacation market for Canadian travel to the Eastern Gateway was again considerably more urban than the overall pattern for Canadian vacationers in the U.S. Well over half of the Canadian visitors to the Eastern Gateway (59%) resided in large metropolitan areas (500,000 + population), compared to 46% for Canadian visitors to the U.S. as a whole. Similarly only 20% of Canadian visitors to the Eastern Gateway in 1976 resided in communities smaller than 30,000 population, compared with 29% of Canadian vacationers to the U.S. overall.

Moreover, visitors to New Jersey were more likely to come from large Canadian centers than were In fact, there appears to be a continuing trend towards the urbanization of the Canadian visitor to New Jersey (from 54% in 1974, to 63% in 1975, and 68% in 1976).

Chart 5
CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY SIZE OF CITY OF RESIDENCE



d) Language Spoken

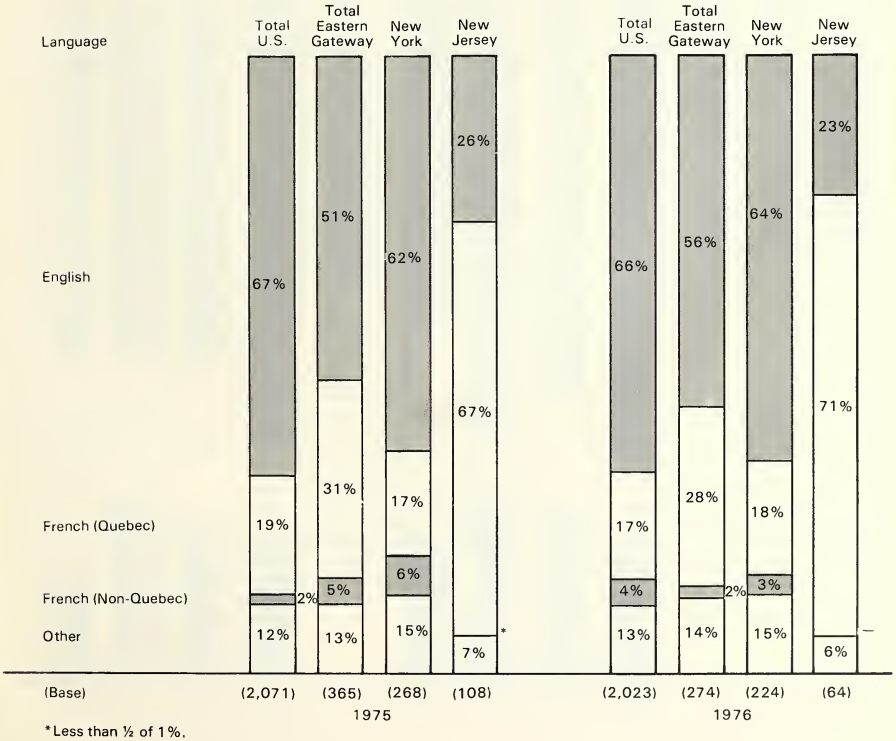
It has been seen that 44% of Canadians visiting the Eastern Gateway come from the province of Quebec in 1976; however, only 28% are French-speaking residents of that province. This indicates that as many as 16% of the Eastern Gateway's visitors from Canada came from the smaller non-French communities of Quebec.

Despite this observation, it is evident that the Eastern Gateway, and New Jersey in particular, was considerably more popular than other regions of the U.S. among the French community in 1976. Overall, 17% of all vacationers to the U.S. were French-speaking residents of Quebec, considerably below the 28% to the Eastern Gateway and 71% to New Jersey.

It should also be noted, however, that the proportion of the Eastern Gateway's Canadian visitors who are French-speaking actually declined from a total of 36% in 1975 to 30% in 1976. This result is, of course, quite closely tied to the already noted reduction in travel to New Jersey (an important destination for French-Quebeckers).

Chart 6

CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY LANGUAGE



*Less than ½ of 1%.

e) Type of Dwelling Occupied/Ownership

In common with most Canadian traveling to the U.S., the majority of Canadians who vacationed in the Eastern Gateway lived in detached or semi-detached homes (53%) and owned their own homes (55%).

However, both of these proportions were considerably lower in 1976 than in 1975, and were below the average for Canadian travelers to the U.S. overall. For example, whereas 66% of Canadian visitors to the U.S. in general lived in single, detached or semi-detached homes, only 53% of the Eastern Gateway's visitors had such residences. Canadian vacationers visiting the Eastern Gateway were much more inclined to live in multiple dwellings (45% in row houses or apartments compared to 31% for the U.S. overall).

Chart 7
CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY TYPE OF DWELLING OCCUPIED

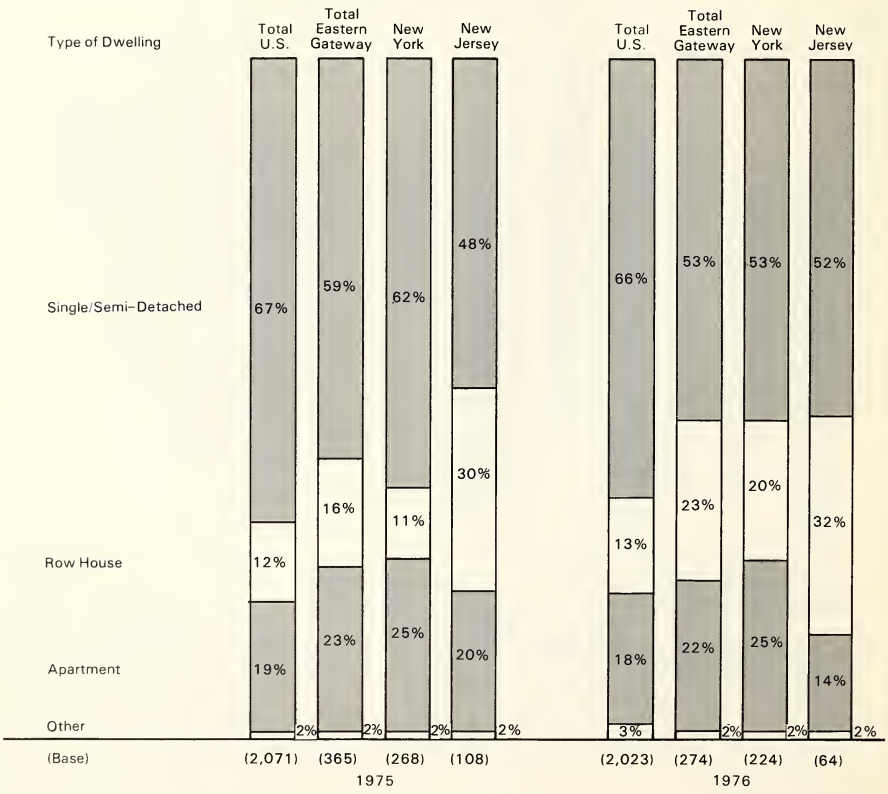


Chart 8

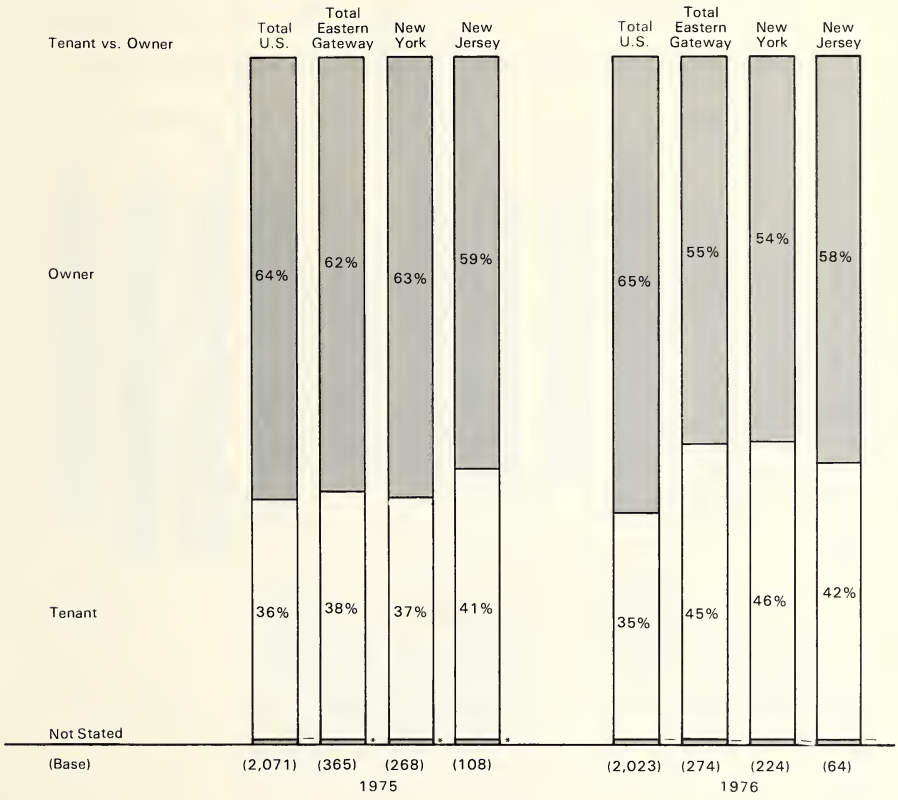
CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY DWELLING OWNERSHIP



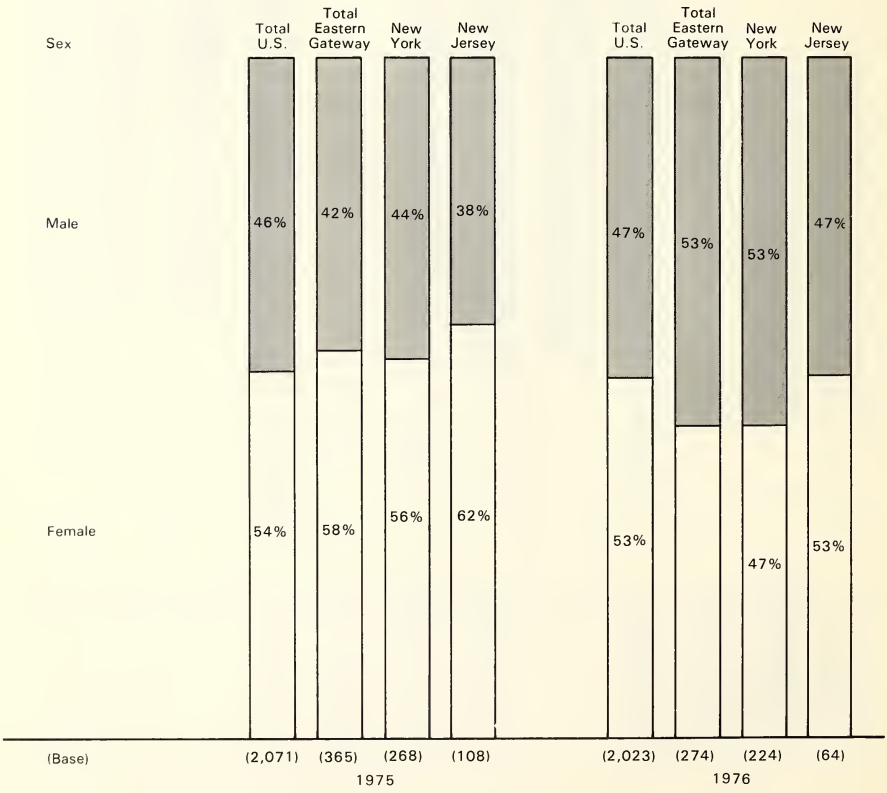
*Less than ½ of 1%.

f) Sex

In 1976, there was an increase in the proportion of male travelers visiting the Eastern Gateway (from 42% in 1975 to 53% in 1976), closely approaching the level recorded in 1974 (55%). The increase was evident both in New York (from 44% in 1975 to 53% in 1976) and in New Jersey (from 38% in 1975 to 47% in 1976).

Canadian visitors to the U.S. overall, in contrast, remained predominantly female (53%).

Chart 9
CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY SEX



g) Age

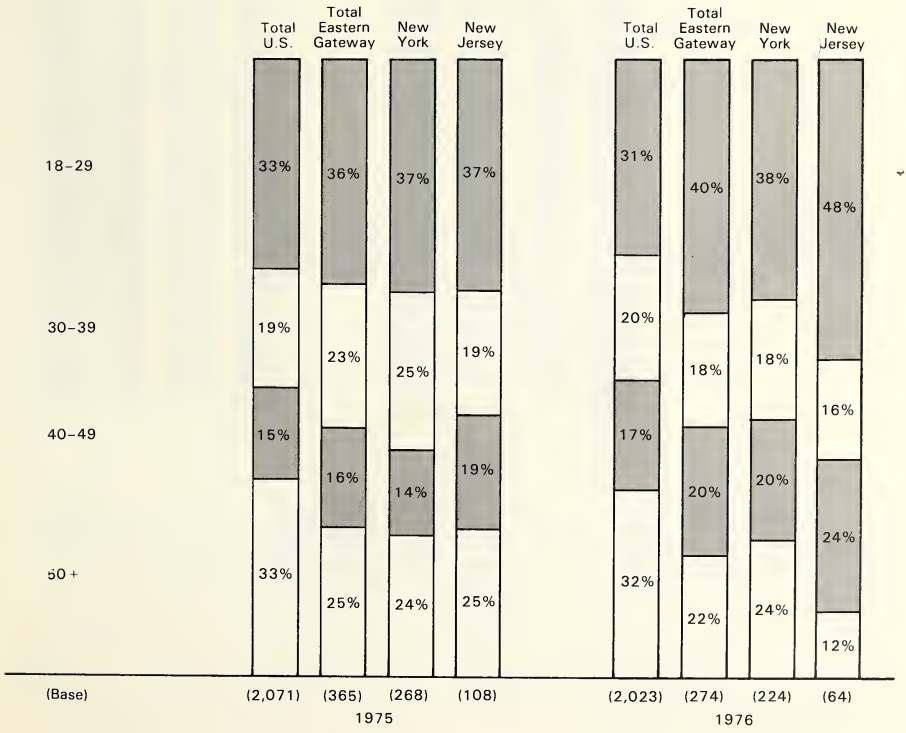
The popularity of the Eastern Gateway as a travel destination amongst younger Canadians continued to grow in 1976. In 1974, 30% of Canadian travelers to the Eastern Gateway were between 18 and 29 years of age, a proportion identical to that for the U.S. as a whole. In 1975, this age group represented 36% of the Eastern Gateway's visitors and, by 1976, had grown to 40% (compared to 31% for the U.S. overall).

Over the three year period, this increasing youth orientation was more evident among Canadian visitors to New Jersey than among those visiting New York.

Consistent with earlier years, fewer Canadians over 50 years of age visited the Eastern Gateway than the U.S. in general. In 1976, 22% of the Canadian visitors to the Eastern Gateway were 50 years of age or over, compared to 32% nationally.

This older age group had a much higher tendency to visit New York than New Jersey.

Chart 10
CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY AGE



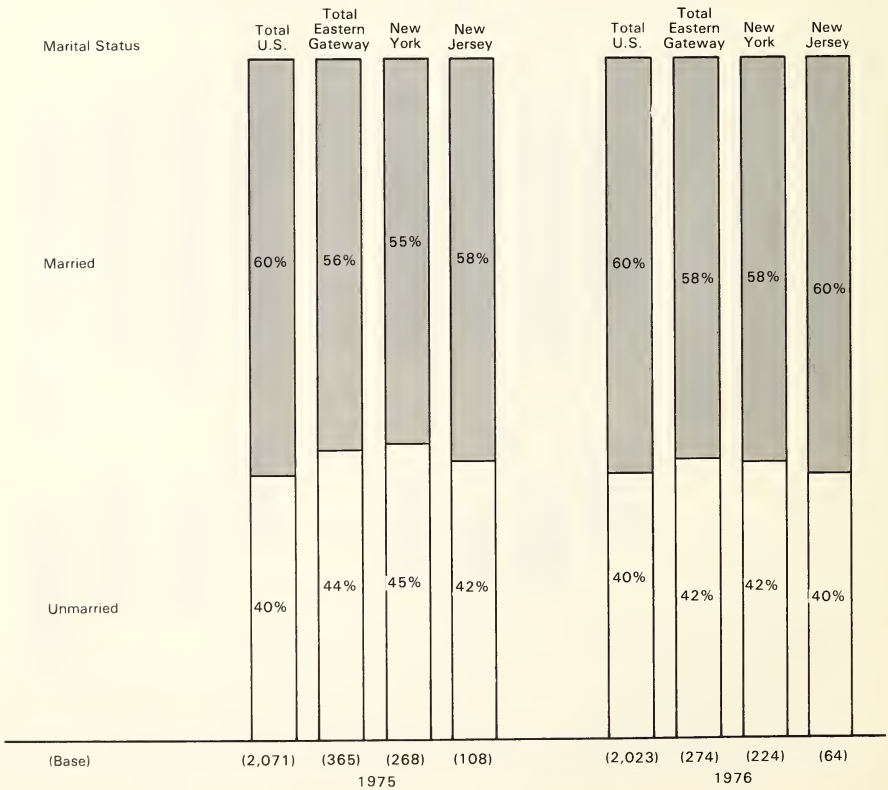
h) Marital Status

In 1976, 58% of all Canadians vacationing in the Eastern Gateway region were married, a proportion which was only marginally lower than for Canadian visitors to the entire U.S. (60%).

Reflecting to a large extent the national picture, there were few changes in the proportion of married Canadians visiting the Eastern Gateway in 1976 (58% married) compared to 1975 (56% married). Both New York and New Jersey registered similar modest increases.

Chart 11

CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY MARITAL STATUS



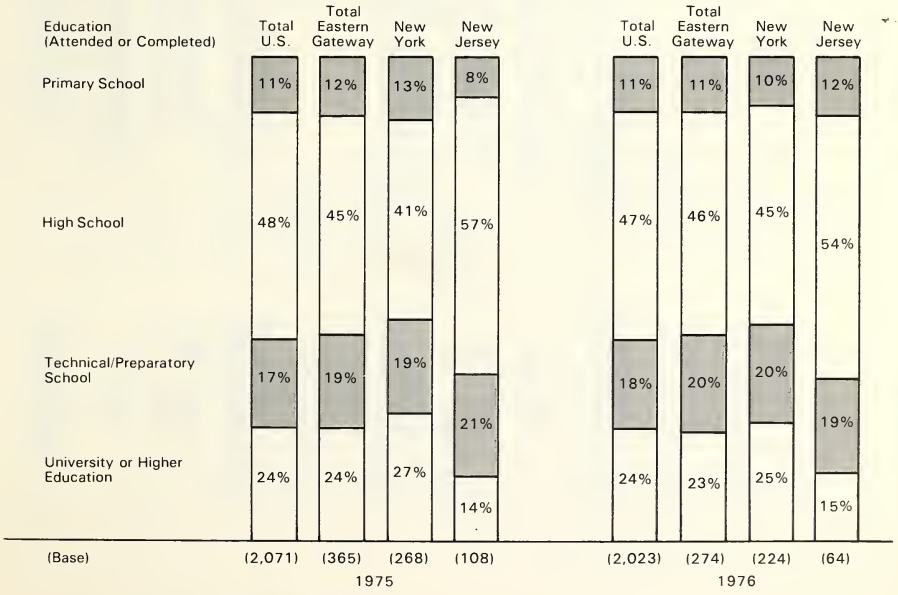
i) Education

The education profile of Canadian vacation visitors to the Eastern Gateway in 1976 was virtually unchanged from 1975. And, in both years, the Eastern Gateway's visitors had education characteristics which were nearly identical to those of the Canadian traveler to the U.S. overall.

As in 1975, 57% of the Eastern Gateway's 1976 Canadian vacation visitors had not gone beyond high school. Twenty-three percent had attended university for a year or more, and an additional 20% were educated in a technical or preparatory school.

Also repeating the pattern observed in 1975, New Jersey's Canadian visitors were much less likely to have attended university (15%) than were New York's (25%).

Chart 12
CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY EDUCATION



j) Occupation of Head of House

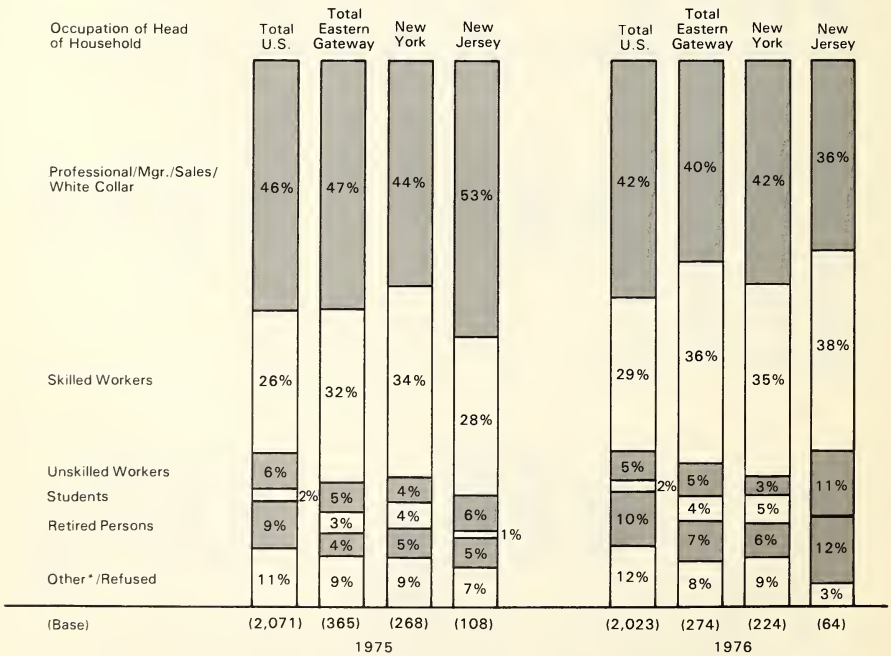
Whereas in 1975 Canadians in households where the chief wage earners were employed in white collar occupations (professionals, managers, and sales and clerical personnel) represented nearly half (47%) of the Eastern Gateway's Canadian vacationers, this representation dropped to 40% in 1976 —42% in New York and 36% in New Jersey. In the same period the skilled worker group increased from 32% in 1975 to 36% in 1976.

Compared to Canadian visitors to the U.S. overall, vacationers to the Eastern Gateway Region were considerably more likely to be employed as skilled workers (36% vs. 29%). This pattern was similar in 1975, when 32% of the Eastern Gateway's Canadian visitors came from households where the chief wage earner was employed as a skilled worker, compared to 26% for the U.S. overall.

In other occupational categories the Eastern Gateway's visitors were not unlike those traveling to the U.S. as a whole. Within the region, however, New Jersey's visitors compared to New York's, were somewhat less represented by white-collar workers, and over represented by unskilled workers and retired persons.

Chart 13

CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY OCCUPATION OF HEAD OF HOUSEHOLD



*Primarily includes housewives and farmers

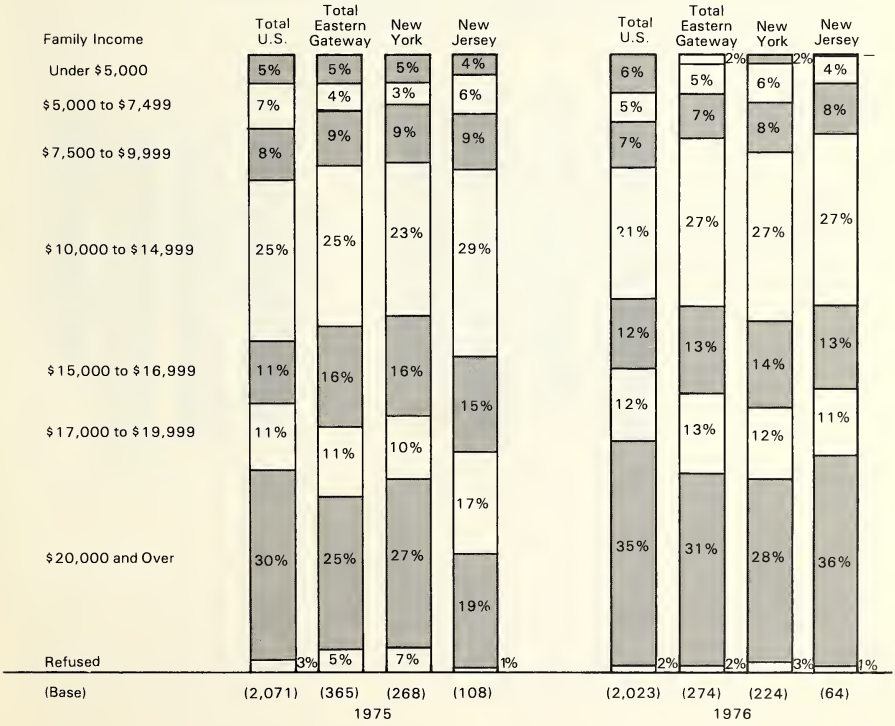
k) Family Income

The median family income of the Eastern Gateway's Canadian visitors was about $16,000 in 1976, similar to the median for Canadians vacationing in the U.S. as a whole, and up by about $1,000 from the 1975 median.

Overall, travelers to New York and to New Jersey tended to be close to the regional average in terms of income, with New Jersey's Canadian visitors tending to be slightly more affluent, 36% of them having family incomes of $20,000 per year and over compared to 31% for the total region.

Chart 14

CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY FAMILY INCOME



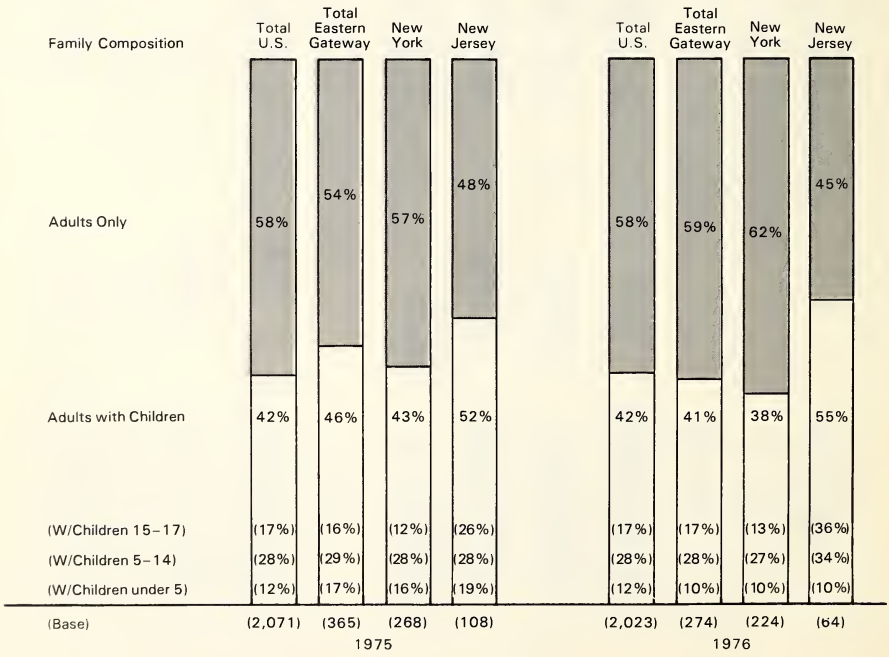
l) Family Composition

Canadian vacationers with no children living at home comprised well over half (59%) of the Canadian vacationers to Eastern Gateway in 1976, a modest increase from the 54% recorded in 1975.

Among those with children, 17% had family members between 15 and 17 years of age, 28% had children between 5 and 14 years of age and 10% had children under 5 years. The family composition of the Eastern Gateway's Canadian visitors was nearly identical to that of Canadian travelers to the U.S. as a whole.

In 1976, New Jersey tended to again attract more "families" than did New York. Specifically, 55% of New Jersey's visitors were Canadians with children, compared to 38% of New York's. Furthermore, New Jersey's Canadian visitors tended to have older children (36% with children aged 15 to 17) than did New York's (13% between 15 and 17).

Chart 15
CANADIAN VACATION TRAVELERS TO THE EASTERN GATEWAY IN 1976 BY FAMILY COMPOSITION



3. Trip Characteristics

Presented in this section are analyses of the following characteristics of 1976 Canadian vacation trips to the Eastern Gateway: purpose of trip/party size; main mode of transport; use of packaged tours; seasonality; accommodation; length of stay; use of a travel agent; decision lead time; favorable impressions of the U.S.; and unfavorable impressions of the U.S.

a) Purpose of Trip/Party Size

The most common reason for travel to the Eastern Gateway Region in 1976 and 1975 was to visit friends or relatives (38%), closely followed by spending time at a vacation spot (37%), and by sightseeing and doing things in cities and towns (29%). More rural activities were also relatively important for Canadians visiting this region, with 14% engaging in sightseeing and doing things away from cities and towns, 13% camping, and 6% fishing, boating, or other outdoor activities.

Interestingly, shopping was not nearly as strong a purpose for traveling to the Eastern Gateway (12%) as it was for the U.S. overall (17%). Even among visitors to New York, shopping was given as a reason by only 14%; and in New Jersey, only 5% of Canadians cited shopping as the reason for traveling to that state.

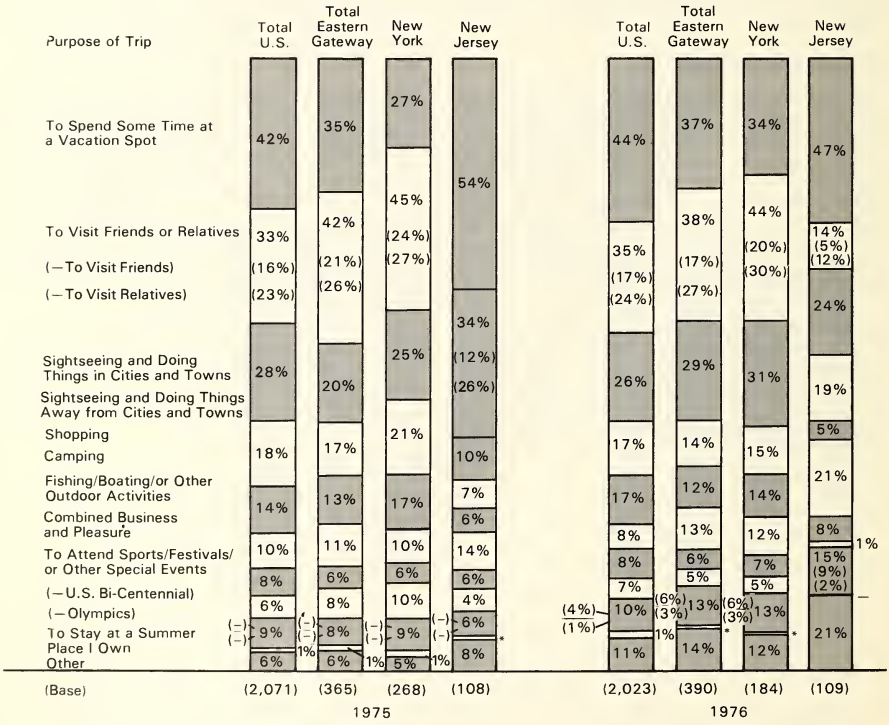
Overall, 13% of the Eastern Gateway's Canadian visitors said attendance at sports/festivals or other special events was their chief purpose for traveling to the region. Nearly half of these (6%) specifically mentioned the U.S. Bicentennial as their motivating reason, slightly higher than for the U.S. overall (4%). Nine percent of the Canadian vacationers to New Jersey mentioned visiting Bicentennial events as their major trip purpose.

Not unexpectedly, Canadian travelers to New Jersey were more inclined than were visitors to New York to pursue interests and activities which were away from cities and towns, including camping (21% vs. 12% for visitors to New York). Similarly, New Jersey, was more attractive to Canadians as a place to spend time at a vacation spot (47%) than was New York (34%). Consequently, visiting friends or relatives was a much less important reason for taking the trip to New Jersey (14%) than to New York (44%) amongst Canadian vacation travelers.

During 1975, the average Canadian party vacationing in the Eastern Gateway consisted of 2.91 adults, up from 2.71 in 1975 and larger than the 2.72 recorded for the U.S. overall in 1976. (See appendix B-2).

Chart 16

CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY PURPOSE OF TRIP



*Less than ½ of 1%

Note: Totals add to more than 100% due to multiple responses

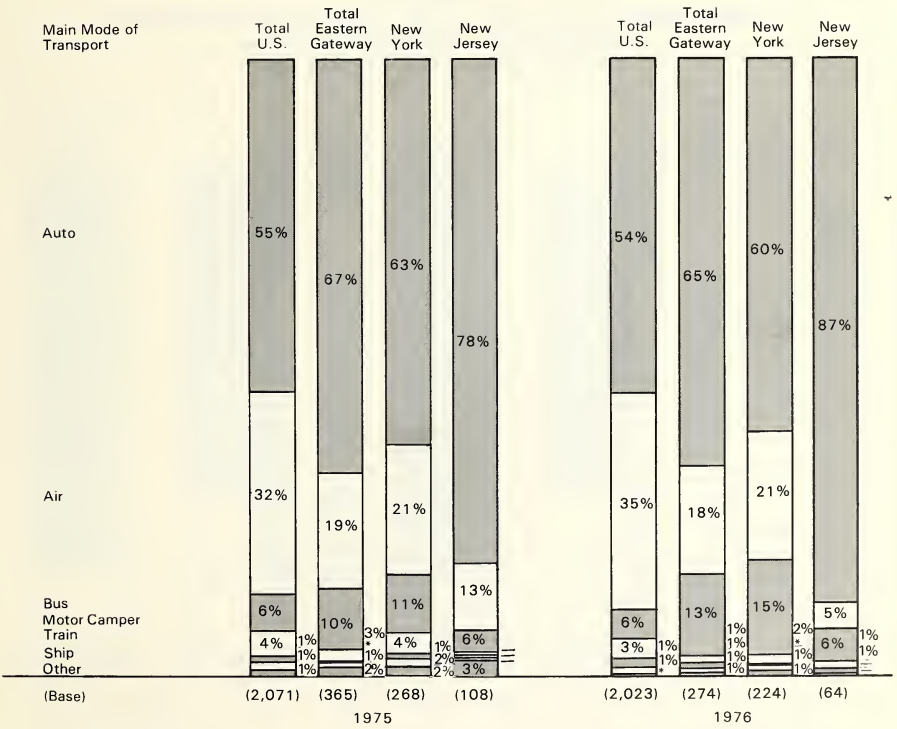
b) Main Mode of Transport

Travel by automobile remained the dominant mode of transportation for Canadians vacationing in the Eastern Gateway in 1976, accounting for 65% of the trips compared to 55% of the Canadian vacation trips to the U.S. as a whole. Both these proportions were virtually unchanged from 1975.

Eighteen percent of the Canadian vacation trips to the Eastern Gateway were by air in 1976, a proportion much lower than the 35% recorded for Canadians traveling to the U.S. overall. This is unsurprising in view of the relative closeness of the region to its major Canadian markets, Ontario and Quebec.

Bus travel, and particularly bus travel to the state of New York, was considerably more popular amongst Canadian travelers to the region (13%) than to the U.S. as a whole (6%).

Chart 17
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY MAIN MODE OF TRANSPORT

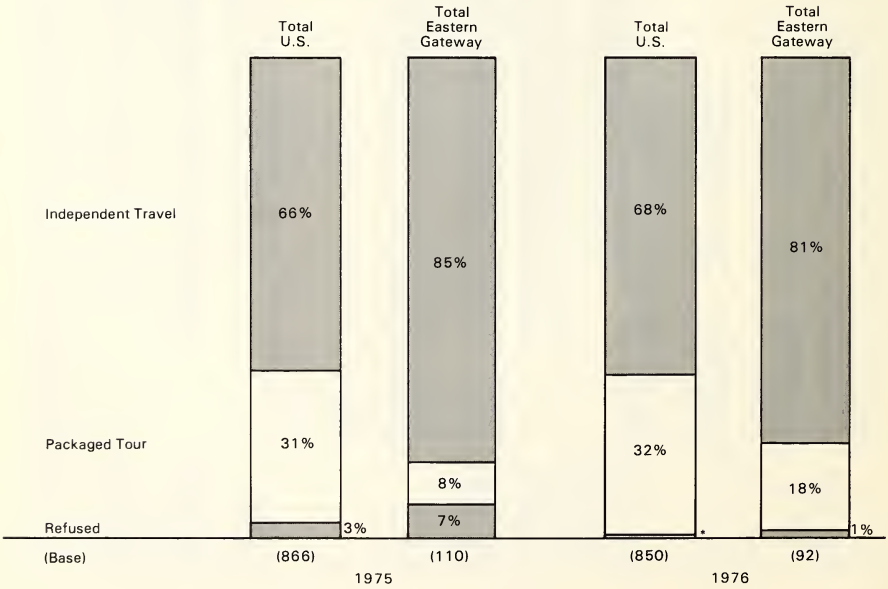


*Less than ½ of 1%

c) Use of Packaged Tours

Among Canadians traveling by common carrier to the Eastern Gateway in 1976 (34%), packaged tours (where "accommodation, transportation fares and other arrangements are purchased for one package price") were purchased by 18%, a sizeable increase over the 8% recorded in 1975. However, this level was still much below the level of common carrier use among all trips to all parts of the U.S.—32%—a level which was virtually unchanged from 1976 (31%).

Chart 18
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY USE OF A PACKAGED TOUR AMONG USERS OF PUBLIC TRANSPORTATION



*Less than ½ of 1%

d) Seasonality

The Eastern Gateway was overwhelmingly a summer destination for Canadian vacationers, with two-thirds of the travelers (66%) choosing the third quarter for visiting that region (compared to 41% of Canadian travelers to the U.S. overall). Furthermore, the proportion of Canadians traveling to the Eastern Gateway from July to September showed a substantial increase from the 60% who did so in 1975.

July was an extremely heavy travel month by Canadians to the Eastern Gateway, with 37% choosing this month to travel (compared with 31% in 1975). The next most popular month was again August, with 21% of the vacation trips. Thus, the remaining 42% of trips to the Eastern Gateway were spread over the remaining ten months, with no particular month receiving more than 8% on the trips in 1976.

Canadians vacationing in New York exhibited a seasonality pattern which was basically a reflection of the regional pattern. New Jersey on the other hand, recorded an even more pronounced summer peak with 86% traveling in the third-quarter (55% in July and 28% in August), up from the already high level of 74% in 1975.

Chart 19
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY SEASONALITY (QUARTERLY)

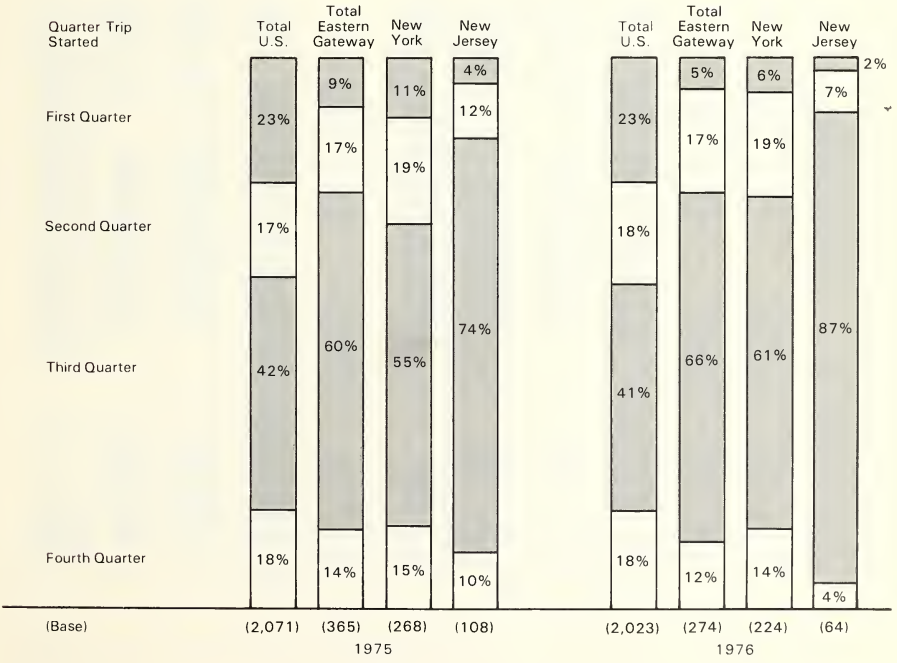


Chart 20

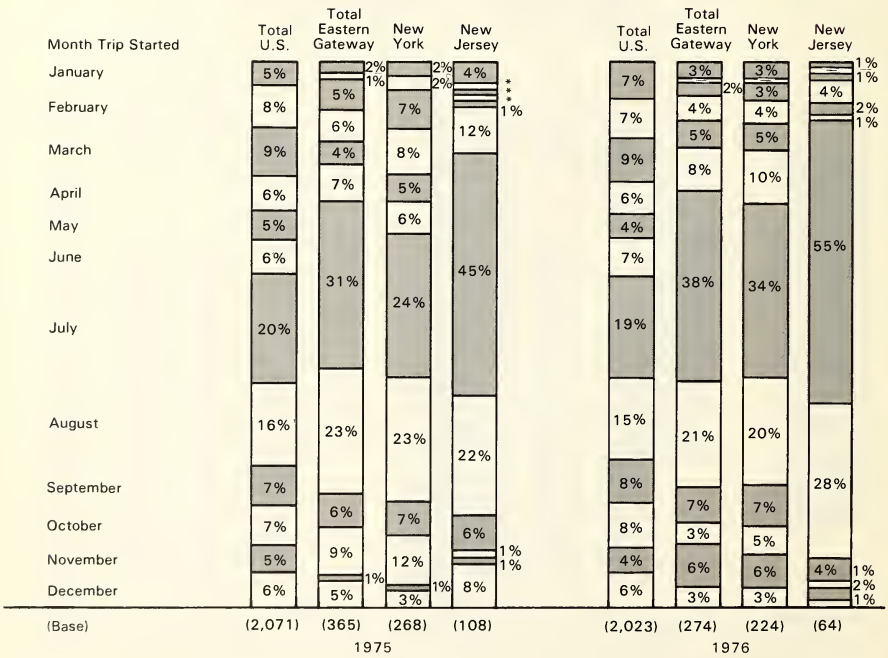
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY SEASONALITY (BY MONTH)



*Less than ½ of 1%

e) Accommodation

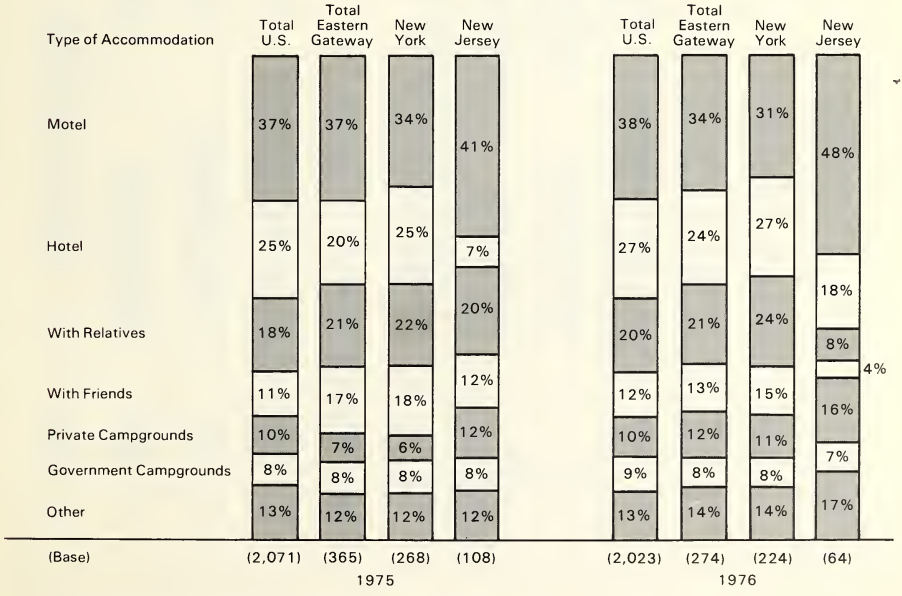
In view of their greater reliance on the automobile, Canadian vacationers in the Eastern Gateway favored motels over any other type of accommodation. In 1976, 34% of Canadian vacation trips to the Eastern Gateway involved staying one or more nights in a motel. Hotel accommodations were used in 24% of the Canadian visits to the Eastern Gateway.

Staying with relatives (21%) and friends (13%) remained an important form of accommodation for Canadians vacationing in the Eastern Gateway, as it was for Canadians traveling in the U.S. as a whole.

Camping, while not a major form of overnight stay in the Eastern Gateway, was nevertheless considerably better for private campground owners in 1976 (12%) than in 1975 (7%). An additional 8% involved staying at government campgrounds.

As might be expected, motels were more popular among New Jersey's Canadian visitors (48%) than among New York's (31%). On the other hand, hotels were more frequently used by Canadians visiting New York (27%) compared to New Jersey (18%). Hotels, however, figured much more prominently in New Jersey's accommodation figure in 1976 than in 1975 when only 8% of Canadian trips to New Jersey involved staying in hotels. One other aspect of the accommodation pattern change for New Jersey was the decline in the importance of staying with relatives (from 20% in 1975 to 8% in 1976) and with friends (from 12% in 1975 to 4% in 1976).

Chart 21
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY TYPE OF ACCOMMODATION



Note: Totals add to more than 100% due to multiple responses

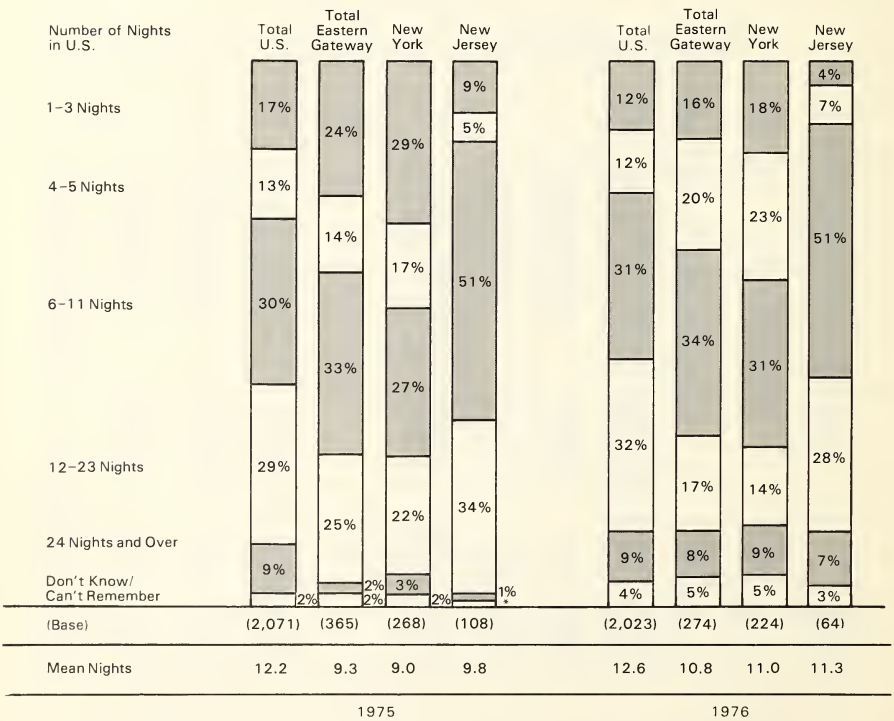
f) Length of Stay

In 1976, Canadian vacationers to the Eastern Gateway stayed an average of 10.8 nights in the United States, nearly 2 nights fewer than the national average of 12.6 nights. Since 1974 however, when Canadian vacationers in the Eastern Gateway stayed an average of 8.2 nights, their length of stay has continued to increase to 9.3 nights in 1975, and 10.8 in 1976.

The most popular length of stay in the Eastern Gateway was 6 to 11 nights (34%), followed by 4 to 5 nights (20%) and 12 to 23 nights (17%).

Canadians visiting New Jersey in particular, while exhibiting an average length of stay which was not much different from the regional average, nevertheless had quite markedly differing profiles, with only 11% staying fewer than 6 nights (compared to the regional figure of 36%) and just over half (51%) staying 6 to 11 nights (compared to 34% for all Canadian vacationers in the Eastern Gateway region).

Chart 22
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY LENGTH OF STAY

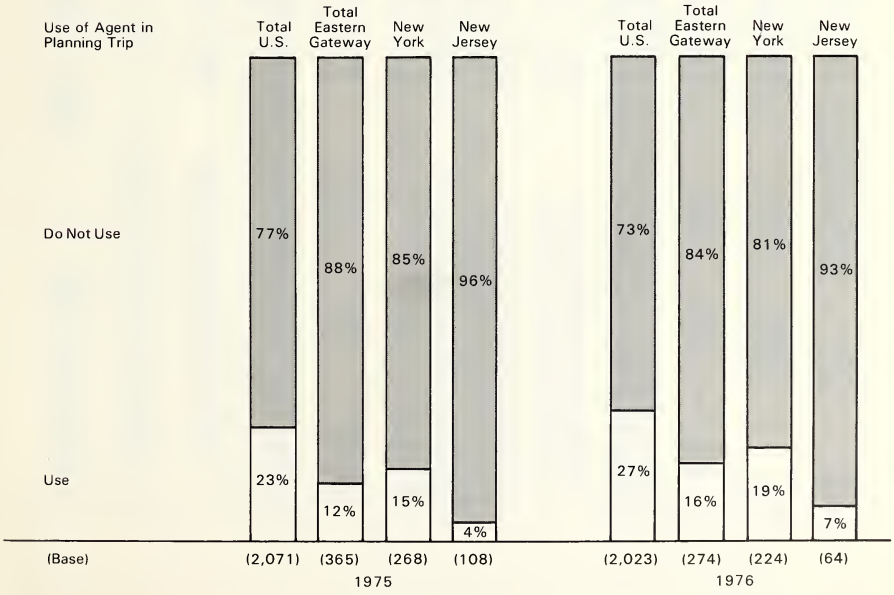


*Less than ½ of 1%.

g) Use of a Travel Agent

Although there was some increase in the use of travel agents among Canadians vacationing in the Eastern Gateway region in 1976 (16%) compared to 1975 (12%), this region was still overwhelmingly visited by Canadians who plan their travel independently.

Chart 23
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY USE OF A TRAVEL AGENT



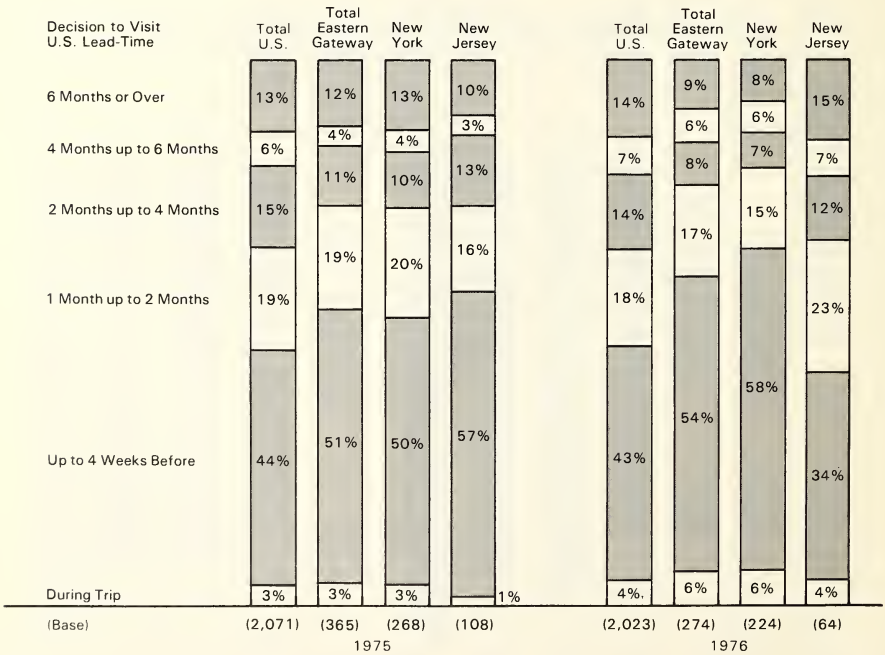
h) Decision Lead Time

Visiting the Eastern Gateway was, for Canadians, more of a spur-of-the-moment event than was the average Canadian trip to the U.S. as a whole. Sixty percent of the Canadian vacationers to the Eastern Gateway decided on their trip within 4 weeks of their departure (including 6% who decided on their destination during the trip), compared to 47% for the Canadian visitors to the U.S. as a whole.

Compared to 1975, when 54% of the Eastern Gateway's visitors decided to travel within 4 weeks of their trip, the 1976 pattern was slightly more spontaneous.

Canadian vacationers to New Jersey were more inclined to spend a longer time planning their trip than were vacationers traveling to New York. Fifteen percent of New Jersey's visitors decided to travel at least 6 months in advance of their trips, compared to 8% for New York's visitors. Likewise, only 38% of Canadians traveling to New Jersey decided within 4 weeks of their trip; for New York's vacationers from Canada, this proportion was 64%. This represents a change from the 1975 picture when there was very little difference in decision lead time between Canadian visitors to New York and to New Jersey.

Chart 24
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY DECISION LEAD-TIME



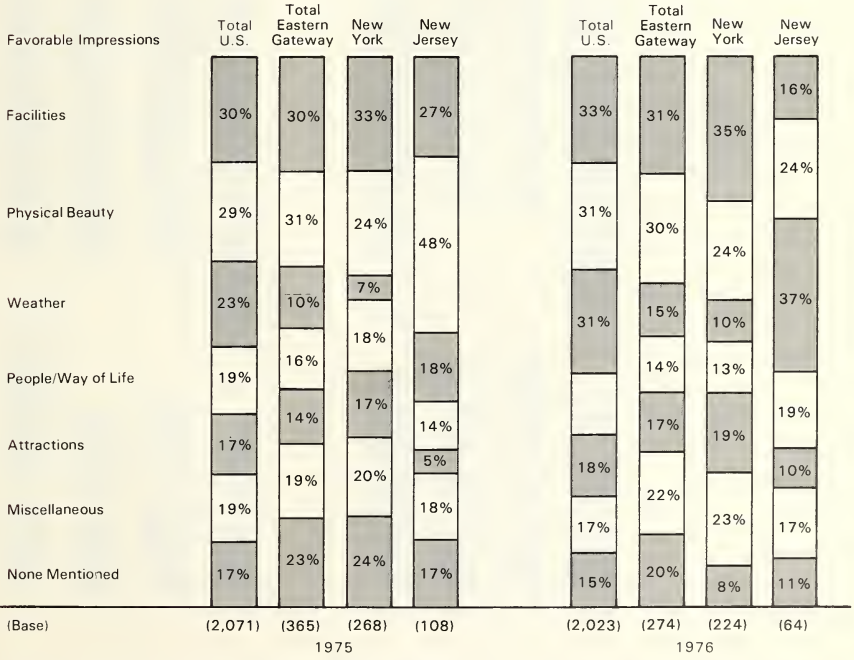
Note: Totals do not add to 100% due to some non-responses

i) Favorable Impressions of the U.S.

The facilities and the physical beauty of the Eastern Gateway Region again were the most favorable impressions Canadian vacationers had of the region. Nearly a third (31%) were impressed by the facilities (including accommodations, restaurants, shopping and roads, among others), and nearly as many (30%) recorded natural appeals, including the beaches and the ocean, among their most favored impressions.

The variety of specific attractions were cited by 17% of all Canadians visiting the Eastern Gateway, 15% were favorably impressed with the weather (up from 10% in 1975), while the people and their way of life impressed 14% of Canadian visitors to the region.

Chart 25
CANADIAN VACATION TRIPS TO THE EASTERN GATEWAY IN 1976 BY FAVORABLE IMPRESSIONS OF U.S.



Note: Totals add to more than 100% due to multiple responses

j) Unfavorable Impressions of the U.S.

In traveling to the U.S. in 1976, even more Canadians (65%) could recall no unfavorable aspects of their recent trip than was the case for 1975 vacationers (58%). Among those who did, however, "urban problems" were again the most commonly cited (14%). Typically these conditions included "dirtiness", "too much smog", "violence", and "traffic".

II. DEFINITION OF TERMS

The definitions used in the study were as follows:

"Vacation" defined for the respondent as not including weekends or long weekends or statutory holidays; or "working holidays." Beyond this, the definition was intentionally left up to the respondent. This procedure was carefully established to avoid a long series of arbitrary decisions as to what was and what was not a vacation. For example, housewives, professional men, retired people and students would each have acquired explicit, arbitrary, and perhaps even inconsistent criteria laid down as to what constituted a vacation. Consequently, the definition of a vacation was completely subjective (aside from the above list of what it was not): if the respondent thought he had a vacation, it was considered that he did.

"Vacation trip" essentially is absence from home. Once again, the precise definition was the respondent's. In practice, virtually all trips reported were of at least one night's duration, and this can be taken as the working criterion.

For analytical purposes a further definitional requirement of a "trip" was made, such that it was "a person or group of people from the same household traveling together." If husband and wife traveled together, it was deemed reasonable that this should be regarded as one trip, not two. For example, they would probably have made a single joint decision to go on the trip. If they went with a couple from another household, this second pair probably would have made a separate decision, so this foursome could be regarded as two trips.

Since individuals (18 or over) were interviewed for these studies, the problem could arise of double counting (or multiple counting) of trips—for example, interviewing husband and wife who had been on a trip together would show two trips, not one. Weighting was used to compensate for this possibility. For each trip it was ascertained how many people (18 and over from the same household) had been on the trip. The reciprocal of this number served as the basis for this corrective weighting.

III. METHODOLOGY

This survey was conducted by Traveldata International using a national probability sample including all but 7% of the entire Canadian population (i.e. persons mainly in institutions or in northern regions of the country). The data are based on approximately 10,000 personal interviews with individuals 18 years and over. Checkbacks were made with approximately 20% of the interviews completed by each interviewer as a quality control measure. Details were recorded for up to three vacation trips per respondent to minimize seasonal bias. No more than two percent of the respondents took more than three such trips, so this survey represents virtually a complete sample of all vacation trips.

Appendix B

CANADIAN VACATION ARRIVALS AND EXPENDITURES IN THE UNITED STATES, BY CHARACTERISTICS OF THE TRAVELER, 1975–1976

(Regional Data Prorated to Equal 100%)

	Base (Trips)		Estimated Household Trips		Estimated Number Canadian Arrivals		Percent of Total Vacation Arrivals		Regional Expenditures in the U.S. ($million)		Percent of total Canadian vacation Expenditures

The amount actually spent in the U.S. per party was $770 in 1976

APPENDIX F

QUESTIONNAIRE

ABOUT TRAVEL—ASK EVERYONE 18 YEARS OF AGE AND OVER

1-a) Did you or any members of your household snow ski during the past 12 months?

YES _____ 10–1 NO _____ 2 GO TO Q. 2-a)

-b) In which provinces, states, and countries did any of them ski during the past 12 months?

CANADA:

B.C.	11–1
ALBERTA	2
SASKATCHEWAN	3
MANITOBA	4
ONTARIO	5
QUEBEC	6
NEW BRUNSWICK	7
NOVA SCOTIA	8
P.E.I.	9
NEWFOUNDLAND	0
TERRITORIES	X

U.S.A.:

WASHINGTON	Y
IDAHO	12–1
UTAH	2
COLORADO	3
NEVADA	4
NEW YORK	5
VERMONT	6
OTHER STATES (SPECIFY)	
	_____
	_____
OTHER COUNTRIES	8
	13–

2-a) Now for some questions on travel. Have you ever flown on a commercial airline?

Yes _____ 14–1 NO _____ 2 GO TO Q. 3-a)

-b) Of all the trips you took by air during the past 12 months, if any, how many were primarily for business reasons, and how many were primarily for non-business reasons?

NONE __ 00

_____
NO. OF BUSINESS TRIPS
(15/16)

NONE __ 00

_____
NO. OF NON-BUSINESS TRIPS
(17/18)

ABOUT TRAVEL—ASK EVERYONE 18 YEARS OF AGE AND OVER

3-a) Now, some questions on holidays, during which you might have travelled or stayed at home. Many people, of course, don't take a vacation for one reason or another, but I'd like you to tell me some things about any holidays or vacations you, yourself, may have had during a 12-month period—let's say from November 1st last year to the end of October this year. Please do not count weekends or long weekends or statutory holidays.

Did you, yourself, take any such vacations or holidays during the past year—that is, since a year ago October 31st?

Yes ---------- ☐ NO ---------- 19–1 GO TO NEXT SECTION

-b) Were you away from home on a trip overnight or longer during that period?

YES ---------- 2 NO ---------- 3 GO TO NEXT SECTION

4. Next, I'd like you to tell me more about the trips you took during your holidays. Let's take the most recent trip first.

NOTE: EACH COLUMN REFERS TO ONE TRIP. ASK QUESTION 4 THROUGH TO QUESTION 20 FOR MOST RECENT TRIP FIRST, THEN REPEAT Q. 4 TO Q. 20 FOR EACH EARLIER VACATION TRIP UNTIL ALL SUCH TRIPS (UP TO A MAXIMUM OF 3) ARE RECORDED FOR THE LAST 12 MONTHS.

Considering the total trip—that is, from the day you left home until the day you got back home—could you tell me all the places where you spent at least one night. That is in each province, each state, or in other countries. Please include any nights you spent on the trip in your own province, and also any nights you spent while you were at your destination.

PLACES SPENT AT LEAST ONE NIGHT	MOST RECENT VACATION TRIP	NEXT MOST RECENT	TRIP BEFORE THAT

NONE OF THESE	2	2	2

-b) And again in that particular area, in which of these types of accommodation did you stay: (READ)

—hotel or motel	47–1	54–1	61–1
—your own vaaction home,	2	2	2
—a campground	3	3	3
—a rental house, cabin or cottage	4	4	4
—with friends or relatives; or	5	5	5
—some other place?	6	6	6

GO TO QUESTION 10 IF TRIP WAS NOT TO CONTINENTAL U.S.A., HAWAII, U.S. VIRGIN ISLANDS, PUERTO RICO.>>

ASK QUESTIONS 7 TO 9 IF TRIP WAS TO CONTINENTAL U.S.A., HAWAII, U.S. VIRGIN ISLANDS, PUERTO RICO.

7. How long before you started on this trip, did you finally decide to visit the United States (or Hawaii/U.S. Virgin Islands/Puerto Rico, if applicable)?

	MOST RECENT VACATION TRIP	NEXT MOST RECENT	TRIP BEFORE THAT
DURING THE TRIP	62–1	10–1	19–1
UP TO 2 WEEKS BEFORE	2	2	2
2 WEEKS UP TO 4 WEEKS	3	3	3
1 MONTH UP TO 2 MONTHS	4	4	4
2 MONTHS UP TO 4 MONTHS	5	5	5
4 MONTHS UP TO 6 MONTHS	6	6	6
6 MONTHS OR OVER	7	7	7

8. On that trip, what were your most favourable impressions about vacationing in the United States (or Hawaii/U.S. Virgin Islands/Puerto Rico, if applicable)? (PROBE) Anything else? (RECORD VERBATIM)

NO FAVOURABLE IMPRESSIONS	☐	☐	☐
	63–	11–	20–
	64–	12–	21–

9. On that trip, what were your most unfavourable impressions about vacationing in the United States (or Hawaii/U.S. Virgin Islands/Puerto Rico, if applicable)? (PROBE) Anything else? (RECORD VERBATIM)

NO UNFAVOURABLE IMPRESSIONS	☐	☐	☐
	65–	13–	22–
	66–	14–	23–

ASK EVERYBODY

10-a) How many nights in total were you away from home on that trip?

TOTAL NUMBER OF NIGHTS:	(67/68)	(15/16)	(24/25)

-b) (IF VISITED BOTH THE UNITED STATES (INCLUDE HAWAII, U.S. VIRGIN ISLANDS AND PUERTO RICO) AND OTHER PLACES OR PROVINCES IN Q. 4 ASK) How many of those nights did you spend in the United States including Hawaii, U.S. Virgin Islands and Puerto Rico?

(69/70)	(17/18)	(26/27)

(71/75)

ASK EVERYBODY

	MOST RECENT VACATION TRIP	NEXT MOST RECENT	TRIP BEFORE THAT
11-a) As best as you can recall, could you tell me about how much was spent altogether by you and your party for that trip, including any credit card purchases or fares—in other words, the total cost of the trip.	$_____ (28/31)	$_____ (43/46)	$_____ (58/61)
ABSOLUTELY CAN'T RECALL	☐	☐	☐
-b) (IF VISITED BOTH THE UNITED STATES (INCLUDE HAWAII, U.S. VIRGIN ISLANDS AND PUERTO RICO) AND OTHER PLACES OR PROVINCES IN Q. 4 ASK) And about how much of that was spent in the United States, (including Hawaii, U.S. Virgin Islands and Puerto Rico) Please include any travel expenditures made in Canada to get there.	$_____ (32/35)	$_____ (47/50)	$_____ (62/65)
ABSOLUTELY CAN'T RECALL	☐	☐	☐

12. Could you tell me in which month you started that trip:

November, 1975	36–2	51–2	66–2
December, 1975	3	3	3
January, 1976	4	4	4
February, 1976	5	5	5
March, 1976	6	6	6
April, 1976	7	7	7
May, 1976	8	8	8
June, 1976	9	9	9
July, 1976	0	0	0
August, 1976	X	X	X
September, 1976	Y	Y	Y
October, 1976	37–1	52–1	67–1

13. (HAND ORANGE CARD 3) In which of these types of accommodation did you stay on this trip?

	38–1	53–1	68–1
HOTEL	1	1	1
MOTEL	2	2	2
RESORT OR LODGE	3	3	3
YOUR OWN VACATION HOME OR COTTAGE	4	4	4
RENTED CABIN OR COTTAGE	5	5	5
